

In The Photoshop Productivity Series: The Productive Workflow—the third and final ebook in the three-part Photoshop Productivity series by Photoshop guru Dave Cross—Dave teaches you that workflow is not nearly as much work as it seems, and he avoids the beginning-to-end, step-by-step concept that many people think about when the word workflow is mentioned. In fact, he prefers the term smart flow to indicate any workflow that takes advantage of the automation capabilities of Photoshop and uses nondestructive, smart techniques to get that work done—and this is what he concentrates on in this ebook. The first concept Dave tackles is working nondestructively, including addressing the use of layers and masks. But why exactly should one work nondestructively? Dave covers that, too, addressing the specific advantages of such a smart flow: accuracy, creativity, efficiency, and flexibility. Dave then dives deep and tackles vector tools, smart objects, smart filters, and what he calls smart templates. After working through this final ebook in Daves Photoshop Productivity series, you will have the skills you need to work smarter—not harder—in Photoshop to get the software to perform what you need, and to do it efficiently, quickly, and nondestructively.

Greenhouse mitigation: Presented at the 1989 Joint Power Generation Conference, Dallas, Texas, October 22-26, 1989 (FACT), An Intercomparison Study of Thermoluminescent Dosimeters for Environmental Measurements (Radiation Protection, 10), Satinn Lace Mens Magazine Dixie Bubbles Tiffany May 1991, The Mystery of the African Gray (Three Cousins Detective Club #22), Complete Idiots Guide to Goldmine 5 (The Complete Idiots Guide),
